

Neon Door Entry Handsets & Ring Intercom

Neon Secure Access Ring Intercom unit Fully compatible with ALL Neon Door Entry handsets.

When attached to a Neon door entry handset, calls from any entrance door panel on the door entry system can be answered via a smartphone anywhere in the world.

There is a clear speech path to and from the visitor at the door. The visitor can also be allowed access through the door if required by pressing the unlock button on the App screen.

The Neon door entry handset can still be answered in the normal way if the resident is at home. To gain this feature the resident will need to purchase a Ring Intercom Unit (directly from Ring - not Neon) and download the Ring Intercom App on to their smartphone.

Please note, you do not need to have a 'Ring Doorbell' to use this feature. The 'Ring Intercom' unit works independently and therefore, you do not need a 'Ring Doorbell' as well.

Contact Lynn Cook on 07715 219 015 for further details.
