Door Entry As It Should Be

Audio & Video Door Entry Handsets by Neon

Video Handset ND4V-S Principle Features include:

- ND4V-S version is a new linear design, to keep the unit compact and much more cost effective to service as the audio and video parts can be changed independent of each other
 - Neon Audio Handsets can be upgraded by 'adding on' the video screen and wall mounted bracket, making it cost effective to upgrade existing handsets to Video Handsets*
 - A mixture of Audio and Video Handsets can be used on the same system*
 - The 4" LCD/TFT colour screen module plugs in to the video port on top of the audio handset
 - The video module can house either 4" (4:3 aspect ratio) OR 4.5" (16:9 aspect ratio) screens – future proofing the unit
 - *The image shown above is set up for a Concierge system with 'Call' button below the privacy button.*
 - High-quality PCB assembly (shown with 'light-ring array' fitted) has SMT components and is CE & RoHS compliant
 - DIL switch enables easy selection of 'privacy' times or 'on/off toggle' mode
 - Call-Tone volume adjustment Extension sounder & strobe connector
 - Video module connector
 - Extension sounder & strobe connector
 - 'C' input to board allows handset to be used on other manufacturers systems.
- *video handsets can be used/upgraded on Neon Systems as long as the distribution is "video ready"
